Re: Death Defying S.O.B. Working Schedule
July 13, 2010

time. Our present political administration seriously needs to consider that these prehistoric political police appointees who are making dangerous decisions to harm or kill hard working police officers and the general public should retire or stay retired, so we can provide proper police protection and professional services for our community in the 21st century. After all, the above cited police officials do not have any criminal strategic plan to combat crime within the limit of its budgetary restraints.

The members of the P.B.A. are optimistic that you would reconsider the death-defying S.O.B. working schedule and put it to rest. We are also hopeful that you would make the necessary recommendations to Governor de Jongh, Jr. to have the above cited politically appointed officials remove and replace with qualified individuals who meet the criteria of making prudent and rational police decisions in the best interest of the general public and visitors alike.

In lieu of the above, the Union wait anxiously for your response to our concerns regarding S.O.B. working schedule before another unfortunate incident occur taking the life of more people in the Virgin Islands based on non-rational, reckless and unstable mental reasoning by the above cited politically appointed police officials.
